

- Experience TV games, TV programs, home videos on PC.
- Enjoy high quality pictures on PC.

Overview

Grand JoyMate, a hand-sized double scan converter box, converts the interlaced video (NTSC/PAL) signal into non-interlaced VGA signal for CRT monitors or LCD panel. OSD function and remote controller make Grand JoyMate user-friendly. It is easily connected to PC, video devices, such as VCR, LD or VCD players and video game machines without any software installation.

Features

- Double scan conversion (15.75KHz to 31.5KHz)
