

MINI CONTROLLER IR/RF7243

Philips Pronto
Compatible

Mini Controller/Transceiver for controlling Marmitek X-10 modules. Control of 8 modules (addresses 1 through 8) using the buttons or remote control (infra-red and RF). Buttons for: On, Off, All lights on, All units off and Dim. Receives all 16 housecodes.

APPLICATIONS

The IR7243 is a quick and easy way to control Marmitek X-10 modules remotely. The unit offers three options:

1. Manual control by pressing the buttons on the unit (8 modules, UnitCode 1 through 8).
Control via an infra-red remote control (Marmitek X-10, Philips Pronto, Fox, One for All). The IR 7243 receives the signals transmitted by the remote control and converts these to the Marmitek X-10 protocol on the mains.

Installation is easy; no need to use any extra wires. The unit is operational as soon as it is plugged in. The IR7243 comes with a 1.5 m long connection wire.

The HouseCode (A ... P) is selected by turning a dial.

The IR7243 has two LEDs (front and top) which light up when a Marmitek X-10 command is transmitted via the mains and when an infra-red Marmitek X-10 command is received from a universal remote control.

2. When an infra-red remote control is used, the UnitCodes 1 through 10 can be controlled.
3. The minicontroller also works as an X10 transceiver for remote controls, motion detectors (MS13) and switches (SS13).

MINI CONTROLLER IR/RF7243

Power:	230V +10% -15 %, 50 Hz
Power consumption:	2 W
Environmental temperature:	0°C – +40°C (in use), -20°C – +70°C (inactive)
Available HouseCodes:	A through P
